DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Des. 425,375 to Parham.

Parham shows a suction cup mounted bottle holder designed to be place on top of a surface and under a bottle of fluid as seen in the Figs. 1-6, the holder holds the bottle in an angle with respect to the surface and has a recessed space with a periphery wall, a cut out in the front of the periphery wall and four rubber friction enhancing feet. With respect to the limitation that the support is intended to be use on a shelf of a refrigerator, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Arnone shows a bottle holder for babies. Dave shows a bottle securing and dispensing apparatus. Anderson shows a fluid dispensing apparatus. Johnson shows a refrigerator rack. Rainey shows container support. Ashley shows a container tipper. Reis shows a baby bottle holder.
